

Ayesha Lubna

AI/ML Engineer & Data Scientist

ayeshalubna6677@gmail.com — +91 82177 39973 — Bengaluru, India

GitHub: Ayshalubna — [LinkedIn: ayeshalubna7040](#)

Professional Summary

Results-oriented data professional specializing in **Data Analytics, Machine Learning, AI Engineering, and Predictive Modeling**. Skilled in **Python, SQL, R, and cloud platforms** to build data pipelines, deploy ML models, and deliver actionable **BI insights**. Passionate about turning complex datasets into strategic decisions and measurable business impact.

Education

Guru Nanak Dev Engineering College (VTU)	2021–2025
B.Tech in Information Science and Engineering	84.55%

Shaheen Group of Institutions	2021
12th (PUC – Science)	93%

Technical Skills

- **Programming:** Python (pandas, NumPy, scikit-learn), R, SQL, C/C++
- **Machine Learning & AI:** XGBoost, LightGBM, Deep Learning (TensorFlow, PyTorch, Keras), NLP (Hugging Face), Generative AI (LLM fine-tuning, Prompt Engineering)
- **Data Engineering & Big Data:** ETL, Data Pipeline Development, Apache Spark, Apache Airflow, dbt, Apache Kafka
- **Cloud & MLOps:** AWS (S3, Lambda, SageMaker), GCP BigQuery, Azure ML, Docker, Kubernetes, Kubeflow, MLflow, FastAPI, Flask, Streamlit
- **Analytics & BI:** Power BI, Tableau, Looker Studio, Advanced Excel (Power Query, Pivot), A/B Testing, Forecasting, Statistical Modeling
- **Version Control & Tools:** Git/GitHub, Jupyter Notebook, Google Colab, VS Code, PyCharm

Soft Skills

- Analytical Thinking & Data-driven Decision Making
- Data Storytelling & Visualization
- Team Collaboration & Leadership
- Problem Solving & Critical Thinking
- Time Management & Project Prioritization

Internships

- **Artificial Intelligence Consultant Intern – Rubixe.ai** (Jan–Mar 2024)
Built predictive models and Power BI dashboards enabling data-driven client decisions.
- **DevOps Intern – Seventh Sense Solutions** (Oct–Nov 2023)
Automated CI/CD pipelines using Jenkins and Docker, achieving 99% deployment success.

- **Soft Skills Intern – Seventh Sense Talent Solutions (2022)**

Completed corporate communication and leadership training.

Projects

- **Telecom Churn Prediction** — Python, Machine Learning
 - Cleaned and engineered 5,000+ customer records to improve data quality.
 - Built Random Forest and XGBoost models achieving 88% accuracy, reducing projected churn by 12% and enabling proactive retention strategies.
- **Flight Price Prediction** — Python, Regression Models
 - Engineered features from historical flight data to enhance model performance.
 - Developed Gradient Boosting regression models predicting flight prices with 90% accuracy.
 - Created an interactive Plotly dashboard for dynamic price visualization and business insights.
- **DevOps CI/CD Pipeline** — Jenkins, Docker, GitHub
 - Designed and implemented CI/CD pipeline automating deployments using Jenkins and Docker.
 - Configured GitHub webhooks to trigger automated builds on AWS EC2.
 - Achieved 99% deployment success rate, ensuring reliable and fast software delivery.
- **AI Content Writing App** — Python, NLP
 - Developed text-generation models using Hugging Face Transformers for real-time content creation.
 - Built a Flask web app and deployed scalable API endpoints on Heroku for user interaction.
 - Improved content generation efficiency, enabling faster and more creative outputs.
- **Skin Disorder Prediction** — Python, CNN, Deep Learning
 - Preprocessed medical image datasets and trained CNN models (ResNet50, VGG16) achieving 92% classification accuracy.
 - Developed a Streamlit app for rapid, user-friendly diagnostic predictions.
 - Enabled faster clinical decision-making and practical application in dermatology use cases.

Certifications & Achievements

- AI Engineer – DataMites
- Data Science Course – DataMites
- AI Assessment (Gold) – NASSCOM FutureSkills Prime
- ML with Python – IBM
- Python Programming – Infosys
- Organizer & Paper Presenter – Intl Conference on AI/IoT/ML 2024
- Job Simulations – Deloitte & BCG Digital Transformation (Forage)
